

PROJECT - 7

This project is testing the <https://magento.softwaretestingboard.com/>

- You need to use Cucumber with Selenium and Java.
- You need to use Page Object Model for automating these scenarios

Prerequisite: Create an account on this website before starting the automation!

Automate Following Test Scenarios

SCENARIO 1 | Login Functionality Test:

- Login with valid credentials and validate you're successfully logged in

SCENARIO 2 | Add New Address Functionality Test:

- Navigate to My Account page
- Click on Manage Addresses
- Add a new address
- Validate Address created successfully

NOTE: Use 'Scenario Outline' for this test and create 3 different addresses at least.

SCENARIO 3 | Purchase Functionality Test:

- Select any product and complete checkout process
- Validate you successfully purchase product
